### Upcoming Session: Viewing COVID-19 Results Through the CRISP ULP \*New

Join CRISP on **Wednesday, July 1, 2020 from 12:30 to 1:00PM** as they discuss how to use CRISP tools to keep track of your patient's COVID-19 lab results through the ENS PROMPT, Health Records, and Patient Snapshot applications through the Unified Landing Page (ULP). [Click here to register](#).

### PCP COVID-19 Testing

#### Your Urgent Response Needed \*New

Governor Hogan is encouraging all primary care providers to test their patients for COVID-19 in support of the long-term statewide testing program. The State will provide PPE and testing supplies as needed to support the in office testing. Survey completion due by **COB Thursday, 6/25**.

[Click here to take  
the Brief Two-  
Question Survey](#)

## COVID-19 Tests - Ordering & Scheduling

- Providers order COVID-19 labs through the ULP and the patient will receive information for how to schedule their appointment.
- [Click here for the CRISP Ordering and Scheduling Cheat Sheet.](#)
- All sites accept all ages.
- PLEASE double-check all patient and provider information prior to submitting an order in ULP – has downstream effects that could create issues with resulting and contact tracing (misspellings, wrong contact information).
- **Note:** Dundalk Health Center and Randallstown Liberty Family Center are both testing sites with walk-through availability, but scheduling is no longer available through the ULP. Similarly, the Owings Mills VEIP and Timonium Fairgrounds continue with drive-through availability and no ULP scheduling. These [Baltimore County testing locations can be scheduled through the county website.](#)

### Recognizing and Responding to Suicide Risk: Essential Skills in Primary Care (Virtual Training)

July 30, 2020 || 5:00 – 6:30 PM

**1.5 CME Credits**

Register here:  
<https://www2.eventbrite.com/registration/StepRe/info.jsp?ActivityID=33747&StepNumber=1>

*20% of those who died by suicide visited their PCP within 24 hours prior to their death.*

*You could be the last medical professional seen by a patient on the brink of a life or death decision.*

The goal of Recognizing and Responding to Suicide Risk: Essential Skills in Primary Care (RRSR-PC) is for primary care practitioners and staff to learn current best practices in eliciting suicide risk when present and meeting the needs of their distressed patients.

#### During this training program, learn:

- Why and how routine suicide risk screening should and can be incorporated into routine medical visits
- What constitutes appropriate risk management strategies and crisis response planning
- How to effectively document a suicide risk assessment in a medical chart

Earn 1.50 AMA PRA Category 1 Credits!

Training developed by the American Association of Suicidology and provided in partnership with the Maryland Suicide Prevention Program <https://www.msupe.org/>

## Suicide Prevention in Primary Care

As Primary Care Providers, you have the power to help prevent death by suicide. You can find the [Suicide Prevention in Primary Care Toolkit](#) online. **\*New**

### "Recognizing and Responding to Suicide Risk" Training **\*New**
